

COMPRESSION SPRINGS

COMPRESSION SPRINGS WITHOUT COMPROMISE

R & L Spring Company is a manufacturer of compression springs that are used for a variety of applications from miniature springs for the medical industry, to springs for a variety of automotive applications, to large clutch and suspension springs for recreational and commercial vehicles. Compression springs are available in round, square, and other special section wire configurations. A range of diameter options and lengths are possible in addition to the constant diameter cylindrical spring, including barrel, conical, hourglass, and other varied diameters or rate configurations.

APPLICATIONS EXPERIENCE THAT EXCEEDS EXPECTATIONS

The experienced engineering team at R & L Spring Company works closely with customers on their custom compression spring applications to ensure specifications are met and quality exceeds expectations. Our Customers are leaders in their industries and they demand high levels of service, so all Customers have one point of contact that provides a dedicated focus to their project.

CUSTOM CAPABILITIES

- Wide range of sizes from miniature springs for medical applications to large suspension springs for recreational and commercial vehicles
- A variety of configurations available including:
 - Round
 - Square
 - Special section wire
- Spring options:
 - Constant diameter cylindrical spring
 - Barrel spring
 - Conical spring
 - Hourglass spring
- Varied diameters or rate configurations available

APPLICATIONS

- Vehicle suspension systems
- Vehicle clutches
- Power steering systems
- Steering and brake systems
- Medical device components including implantables
- Drug delivery devices for insulin, atomizers, etc.
- Valves
- Commercial and residential door hardware
