

FOUR SLIDE COMPONENTS

CUSTOM FOUR SLIDE COMPONENTS

R & L Spring Company is a manufacturer of four slide components that are used in a variety of applications including powersports, automotive, construction, medical device, electrical and consumer goods. Four slide manufacturing utilizes machinery with slides that stamp and/or bend material from multiple sides into complex forms. Four slide manufacturing has a high rate of production with minimal material waste, making it a cost-effective solution for parts requiring complex bends.

APPLICATIONS

- Leaf Springs
- Brackets
- Spring Clips
- Clamps
- Fasteners
- Retaining Rings
- Simple Bus Bars
- Medical Appliance Components

CUSTOM CAPABILITIES

- Versatility is evident in our capability to produce complex stamped and/or formed components
- Our coiling capability is enhanced with bending, forming, stamping and shaping in one operation
- Our traditional four slide machines offer precision components in wire or flat stock with low-cost tooling and high-speed production

DESIGN EXPERIENCE THAT EXCEEDS EXPECTATIONS

Four slide components are used for rings, wireforms, flat stamped springs, leaf springs, clamps, fasteners, and clips. R & L Spring Company has the capability to design and manufacture four slide components in an array of forms, shapes, and sizes for multiple custom applications. Our Customer base includes companies who are leaders in their industry and demand high levels of service, which is why we assign one point of contact to our customers. This commitment to service ensures that Customers receive the dedicated focus on their custom four slide applications to provide a level of service and quality that meets expectations.
